

Crear una tarea (POST)

The screenshot shows the Postman interface with a workspace named "Leonardo Gutierrez's Workspace". The main panel displays a POST request to `http://localhost:8080/api/tareas`. The request body is a JSON object:

```
{
  "titulo": "Proyecto API REST Spring Boot",
  "descripcion": "Gestion de Tareas",
  "estado": "PENDIENTE"
}
```

The request is sent, and the response is shown in the "Body" tab. The response is a JSON object with a status of 201:

```
{
  "descripcion": "Gestion de Tareas",
  "estado": "PENDIENTE",
  "fechaCreacion": "2026-05-06T12:03:50.4229399",
  "id": 2,
  "titulo": "Proyecto API REST Spring Boot"
}
```

The response status is "201 Created" with a response time of 12 ms and a size of 319 B. The left sidebar shows "COLLECTIONS" with "My Collection" selected. The bottom sidebar shows "ENVIRONMENTS", "SPECS", and "FLOWS". The right sidebar contains an "API Documentation C..." section with a chat interface for an "Onboarding-Agent".

Obtener todas las tareas (GET)

The screenshot shows the Postman interface with a GET request to `http://localhost:8080/api/tareas`. The request body is a JSON object:

```
1 {
2   "titulo": "Proyecto API REST Spring Boot",
3   "descripcion": "Gestion de Tareas",
4   "estado": "PENDIENTE"
5 }
```

The response is a 200 OK status with a JSON array of two task objects:

```
1 [
2   {
3     "descripcion": "Hacer API REST",
4     "estado": "PENDIENTE",
5     "fechaCreacion": "2026-05-06T12:02:11.215804",
6     "id": 1,
7     "titulo": "Estudiar Spring Boot"
8   },
9   {
10    "descripcion": "Gestion de Tareas",
11    "estado": "PENDIENTE",
12    "fechaCreacion": "2026-05-06T12:03:50.42294",
13    "id": 2,
14    "titulo": "Proyecto API REST Spring Boot"
15  }
16 ]
```

On the right side, there is an AI chat window titled "API Documentation C..." with the following text:

#Onboarding-Agent Help me create API documentation.

fastest way to create API documentation is to use that collection as the source.

First step: I need to confirm whether you want me to document [My Collection](#) or the request you currently have open for `http://localhost:8080/api/tareas` as if it isn't saved there yet.

If you want, I can proceed with [My Collection](#) and then gather its endpoints, descriptions, and examples next.

Also, if you're just getting started with Postman, I can help you take the onboarding tour after this or continue straight into documenting your API.

Describe what you need. Press @ for context, / for Skills.

Auto

Obtener por ID

The screenshot displays the Postman interface with a REST client request configured for the endpoint `http://localhost:8080/api/tareas/1`. The request method is `GET`. The request body is set to `raw` with a JSON payload:

```
{
  "titulo": "Proyecto API REST Spring Boot",
  "descripcion": "Gestion de Tareas",
  "estado": "PENDIENTE"
}
```

The response status is `200 OK` with a response time of 21 ms and a body size of 294 B. The response body is shown in JSON format:

```
{
  "descripcion": "Hacer API REST",
  "estado": "PENDIENTE",
  "fechaCreacion": "2026-05-06T12:02:11.215804",
  "id": 1,
  "titulo": "Estudiar Spring Boot"
}
```

On the right side, there is an AI chat window titled "API Documentation C..." with the following text:

#Onboarding-Agent Help me create API documentation.

fastest way to create API documentation is to use that collection as the source.

First step: I need to confirm whether you want me to document [My Collection](#) or the request you currently have open for `http://localhost:8080/api/tareas` as if it isn't saved there yet.

Describe what you need. Press @ for context, / for Skills.

Auto

Eliminar Tarea (Delete)

The screenshot shows the Postman interface with a DELETE request to `http://localhost:8080/api/tareas/1`. The request body is a JSON object:

```
{  "titulo": "Actualizar tarea",  "descripcion": "Ahora en progreso",  "estado": "EN_PROGRESO"}
```

The response is a 404 Not Found error with the message "Tarea no encontrada".

On the right side, there is an AI chat window titled "API Documentation C..." with the following text:

#Onboarding-Agent Help me create API documentation.

fastest way to create API documentation is to use that collection as the source.

First step: I need to confirm whether you want me to document [My Collection](#) or the request you currently have open for `http://localhost:8080/api/tare` as if it isn't saved there yet.

If you want, I can proceed with [My Collection](#) and then gather its endpoints, descriptions, and examples next.

Also, if you're just getting started with Postman, I can help you take the onboarding tour after this or continue straight into documenting your API.

At the bottom of the AI chat window, there is a text input field with the placeholder "Describe what you need. Press @ for context, / for Skills." and an "Auto" button.

Filtrar por estado

The screenshot displays the Postman application interface. At the top, the workspace is named "Leonardo Gutierrez's Workspace". The main area shows an HTTP GET request to `http://localhost:8080/api/tareas/estado/PENDIENTE`. The request body is in raw JSON format, containing a task object with the following details:

```
{
  "titulo": "Actualizar tarea",
  "descripcion": "Ahora en progreso",
  "estado": "EN_PROGRESO"
}
```

The response is a 200 OK status, received in 12 ms with a body size of 307 B. The response body is in JSON format, showing an array of task objects:

```
[
  {
    "descripcion": "Gestion de Tareas",
    "estado": "PENDIENTE",
    "fechaCreacion": "2026-05-06T12:03:50.42294",
    "id": 2,
    "titulo": "Proyecto API REST Spring Boot"
  }
]
```

On the right side, there is an "API Documentation C..." panel with a chat interface. The chat contains the following text:

#Onboarding-Agent Help me create API documentation.

fastest way to create API documentation is to use that collection as the source.

First step: I need to confirm whether you want me to document [My Collection](#) or the request you currently have open for `http://localhost:8080/api/tare` as if it isn't saved there yet.

If you want, I can proceed with [My Collection](#) and then gather its endpoints, descriptions, and examples next.

Also, if you're just getting started with Postman, I can help you take the onboarding tour after this or continue straight into documenting your API.

At the bottom of the chat, there is a prompt: "Describe what you need. Press @ for context, / for Skills."
